## How to reset fossil smartwatch

Hi I have a bootloop on the Fossil Gen 5G There are suggestions about accessing the "recovery menu", but this model only have one button, and I'm not sure where it is the pinhole for hard reset. I don't want to screw it up confusing some mic hole with the reset pinhole. I can not reset the watch with the GUI because it reboots before finishing the procedure. Does anybody know how to go to the "recovery menu" on this model that only has one button? Regards Alternatively you could try this if the 5E's functions are anything similar to the 5/5LTE. (Though I'm not entirely sure how if the 5E only has the one crown button) Hi I have a bootloop on the Fossil Gen 5G There are suggestions about accessing the "recovery menu", but this model only have one button, and I'm not sure where it is the pinhole for hard reset. I don't want to screw it up confusing some mic hole with the reset pinhole. I can not reset the watch with the GUI because it reboots before finishing the procedure. Does anybody know how to go to the "recovery menu" on this model that only has one button? Regards hi mate where you able to find solution? I have same issue I To reset your screen, press and hold the middle button of the device to force a restart. This can take several seconds.Hard Reset FOSSIL Gen 5 Smartwatch Julianna HFRAT the onset, press the Middle button to wake up the screen.Afterward, press the Middle button to open the menu.Once you're in the menu scroll down and tap Settings.Then scroll down and tap the System.Now find and tap the Disconnect & reset.Lastly, tap the checkmark to confirm and start the reset.Great work!Press and hold the Power key until REBOOTING displays at the bottom of the screen. Press the Power key three times quickly until the Select REBOOT MODE screen displays.Open Settings, and select System.Select Reset options.Select Erase all data (factory reset).Select Reset Phone or Reset Tablet at the bottom.You'll be asked to confirm, select Erase Everything.Your device should reboot and may show a progress screen indicating that it is erasing the data.In the beginning, press the Power button to wake up the device.Afterward, tap on the Menu, then find Settings and tap on it.Then scroll down and tap on the Restore settings.When prompted enter the "1122" password, then tap Yes to confirm and begin the reset.Good work!If you forget your unlock pattern, pin, or passwordStep 1: Disconnect and reset your watch. On your Android phone, open the Wear OS by Google app . At the bottom, tap Advanced Settings. Step 2: Set up your watch and phone from the beginning. On your phone, open the Wear OS by Google app . Tap Start Setup.The password by default is 1122.How do you unlock a phone watch?Open the Settings app on your iPhone. Tap Face ID & Passcode, then type your passcode. Scroll down to Unlock with Apple Watch, then turn on the feature next to your watch's name.How do I turn off the touch lock on my Fossil watch?To lock touch controls, open Settings > Display > Touch Lock. While enabled, you can touch the screen as much as you want and it won't react. To disable touch controls, press one of the hardware buttons on your Android Wear watch.How do I turn off Touch lock mode?To turn it on/off: Tap the Game Genie icon. 2. Tap the Lock touch button to turn it on/off.How can I make my smartwatch faster?Is it okay to turn off my smartwatch at night? If you are not using the smartwatch then it is absolutely fine to turn it off at night as it will save battery life. Since these smart wearables always run some processes in the background continuously to operate, which in turn uses battery.Why is my watch slow?If the watch slows down or speeds up it is usually an indication that the movement needs more elaborate service. Quartz movements are the simplest and most accurate of all watch movements. Every movement has its own personality and own quirks. If these two positions don't work for you, try it dial up or dial down. Depending on the model of your watch and its usage, your battery will last from 5 to 12 months.It's fine. M Klett, PhD and post doc in Lithium Ion Battery Degradation states that despite the switch off batteries age faster when left on the charger. Klett recommends charging but stopping at 90% for several reasons.If you recently installed an app and notice that your battery is draining faster than normal, try uninstalling that app. To uninstall an app on your watch, you need to uninstall the app from the phone your watch is paired with.Can Fossil watch batteries be replaced?Visit your local Fossil store to get your watch battery replaced while you shop! We do not recommend trying to change the battery yourself, as the internal movement can be damaged in this process. You are also welcome to take your watch into a local reputable jeweler to see if they can change the battery.How do you take the back off of a fossil watch without the tool?Reliable Construction. Many customers testify that their Fossil watch lasts for years. The watches carry a two-year warranty. In more than two decades in the watchmaking industry, Fossil designed and produced watches with reliable craftsmanship and impeccable quality. Related Articles Recent Posts Popular Articles fossil smartwatch keeps restarting Watches are a part of the culture, fashion, and every attire and it goes without saying that they are never going to be out of the fashion. With the boom of technology, while there are multiple other ways to know the time such as smartphones and other devices that we can get our hands upon. However, from pocket watches to wristwatches and more, a traditional watch is always there to lift up the attire and make it look classier. Just when we thought that the time of wrist watches might be over, we are getting these smartwatches with all the latest features such as calling, monitoring your vital stats, and a lot more. Fossil is one such extraordinary brand that is known for some of the best wristwatches that are classy, affordable, and durable all at once. They have also stepped into the world of smartwatches, and you get to enjoy state-of-the-art smartwatches with the best possible quality and features on them. These smartwatches from Fossil are pretty durable as well, and optimally you are not going to face such issues while using the Smartwatch. However, if it keeps on restarting, here are a few things that you will need to do. How to Fix Fossil Smartwatch Keeps Restarting? 1. Unpair From Phone and Pair Again At times, you might be facing this bug due to some sort of problem with the phone but it is pretty easy to fix as well. All you will need to do is ensure that you are unpairing the fossil smartwatch from the phone that you have paired it with and let it rest for a minute or two. After that, you can pair the watch with your phone once again and that will simply help you fix any errors that you might be facing with the fossil smartwatch causing it to restart on its own and you are not going to face any major problems at all once you get that sorted out properly. 2. Restart Once Another thing that you will need to be careful about on the smartwatch is that it has a small processor and lesser RAM as well as compared to some of the other devices that you might have. That is why you will have to ensure that you are restarting it on regular occasions to not put too much strain on the hardware resources. So, just restart it at least once a week and that is certainly going to help you sort this problem out. If you are facing the problem with restart, you can just let it sit while turned off for a couple of minutes and then turn it on to get rid of the problem on your Fossil Smartwatch. 3. Reset There might also be some settings that could possibly cause you to face this problem, and you need to get rid of such settings as well. In order to do that, the best way would be to run a factory reset on the watch and that will help you perfectly in solving the problem. Luckily, the Fossil watch runs Android Wear, an OS based on Android and you get all the basic features that you might be expecting from it. So, in order to reset, you just have to go to the settings and then reset it from the advanced settings menu. That will certainly be helping you out in resetting any settings that might be causing you to face this problem and it will be gone for good. 4. Update Firmware There is another possibility and you might have to face this problem with your Fossil smartwatch due to some firmware error or issue. So, you will need to check for the firmware updates, and Android Wear gets plenty of them for sure. Just update the firmware and the problem is most likely to be gone for good. It would be better if you keep the auto-updates on for the firmware and that is certainly going to help you out in avoiding all such errors and problems in the future. 5. Get it Checked Lastly, if nothing has worked out for you, there might be some other problem with the hardware or the batteries that need to be checked by Fossil and they will be able to fix that up for you as well. This morning like most mornings, I woke up and strapped on my Fossil Carlyle Gen 5 smartwatch. The screen was black, but usually, that's not a big deal. I tap it or press a button, and it turns on. But not this morning. Today, my Fossil's screen remained dark. Okay, restart it by pressing the middle button for a few seconds. Nope, that didn't work. It wasn't working and seemed stuck or, worse, dead. The good news is that I did find a way to get it back working-here's how. Related reading Long Restart your Fossil smartwatch Although this method did not work for me, try this first. Press and hold down the crown (middle button) until the watch vibrates (may take 30-60 seconds.) After vibrating, release the button and wait to see if your watch turns on. Reboot your Fossil wearOS smartwatch Clean your watch's backside and its charger with a lint-free cloth to remove any dirt, debris, or grease. Place your Fossil on its charger and charge it up for 30 minutes (just in case your watch's battery was depleted.) Remove the watch from its charger. Hold down all three buttons until you feel the watch vibrate, then release. Usually, this takes 20-30 seconds but maybe as long as 45 seconds. Press and hold the middle button (the crown) for a few seconds until you feel another vibration and wait for the Fossil logo to appear on your watch's screen, then release the button. When you see the Fossil logo on-screen, that's a great sign! Wait for the watch to reboot to its clockface fully. If your Fossil watch still doesn't work, try these steps: Press and hold all 3 buttons until it vibrates 4 times. Then, release all three buttons. Wait for 10-15 seconds. Press and hold the crown (middle button) until it vibrates, then release the button and wait for the watch to reboot. You may need to repeat this process a few times to get your watch to turn on. Still not working? If you tried all the steps and performed them multiple times, but your watch still won't turn on, it's likely a hardware problem that needs attention from Fossil's support team. First, gather all your paperwork, including the original receipt (proof of purchase), and then reach out directly to Fossil's customer support. Fossil requires a printed copy of the receipt is required for all warranty repairs. Fossil's warranty currently covers your watch for two years. If your watch is out of its warranty, you may have purchased it on a credit card that offers additional warranty coverage. Check with your credit card provider on their policy for extended warranties. Something went wrong. Wait a moment and try again. Hey everyone, any idea how to factory reset Fossil Collider? I tried everything, holding the middle button, unpairing the device and I even called the support team but they had no answer ☹
